

# QUICKWALL

## Decorative and Protective Coatings

**A**rchitects and designers can be assured when specifying finishes for the harsh, wet, tropical environs, that Quickwall exterior coatings will stand the test of time.

**Q**uickwall manufactures a wide range of quality interior and exterior coatings, suitable for commercial and domestic projects. Our systems are also ideally suited to the renovation market with no need to remove existing paint. Quickwall specialises in trowel applied cement render finishes, roller applied texture paints, quality exterior paints, roofing paints and waterproofing systems.

The use of the finest quality materials in our unique coatings systems ensures that whatever the climate, Quickwall emerges the forerunner in the Architectural Coatings Marketplace.

The long term durability of our Quickwall coatings together with the quality assurances in our manufacturing, guarantees that the high standard of our products remains without rival, and are both competitive and cost effective.

Locally owned and operated, Quickwall employs environmentally friendly work practices. Our products are non-toxic and wash up in water.

... SOME POPULAR FINISHES ...

traditional render - trowel

### TRADITIONAL RENDER

Polymer modified dual purpose traditional cement render for obtaining a traditional sponged finish render, or for preparing most substrates as a base coat.

Traditional render can be used as a thin filament coating eg. Skimcoat base coats, or as a higher build screed finish of up to 12mm with excellent holding properties. Traditional Render is a versatile finish suitable for multiple applications.

traditional render - sponge

### QUICKSAND

A timeless flat render finish similar to a sponge floated sand and cement plaster. Quicksand will not go drummy or delaminate like sand and cement render often does. Quicksand is a tough 2 pack polymer modified mineral based material that bonds to practically any substrate.

quicksand

### QUICK TROWEL

Seamless vertical scratch-coat decorative and protective wall finish in grades of 1.5mm, 2mm and 3mm. Final finish is by plastic trowel for a smooth flat jointless finish. A popular up-market finish.

quick trowel

Choice of tough, durable, permanent 2 pack Mineral polymer system or Acrylic system is available.

sandstone

### SANDSTONE

A seamless, modern but ageless decorative and protective wall coating system. Plastic trowel finished to provide a smooth textured finish in 1.5mm, 2mm and 3mm grades. Mimics the face of a freshly cut block of sandstone.

Choice of tough, durable permanent 2 pack Mineral polymer system or Acrylic system is available.

tuscany render

### TUSCANY RENDER PAINT

A fine acrylic roller or brush applied texture paint. Tuscany is available in fine medium and course grades and can be tinted to an extensive range of colours.

Quickwall 2 Pack Flexible Polymer Cement is used in hot tropical wet climates of northern Australia and Asia, dry climates of central Australia, in earthquake regions of New Zealand, to fluctuating temperatures of -30 to +30 degrees Celcius in northern Chinese provinces.

The many advantages include:

- A failure-free history since 1974
- Easy to use on "dry or wet" substrates in practically any environment
- Bonds to practically any substrate
- Never goes drummy
- Will not blister, peel or delaminate
- Excellent salt resistance
- Economical, non toxic and environmentally friendly

The unique sophisticated blended polymer technology is exclusive to Quickwall and used extensively on Quickwall Buildings Systems such as QuickClad, as well as bricks, masonry blocks, concrete, cement sheeting, and AAC.
